Kids love to
touch, explore,
play with
physical stuff.

this is a random idea, but I
thought of an installation where
all of the music is playing at the
same time, and then you have to
do something like in this video to
listen only that music, so other
music goes quiet and only that
one plays lol (dont ask how I
came to this idea)

This might be too
complicated, too
small, too precise,
not that
impressive

User test 01 (Lo-fi)

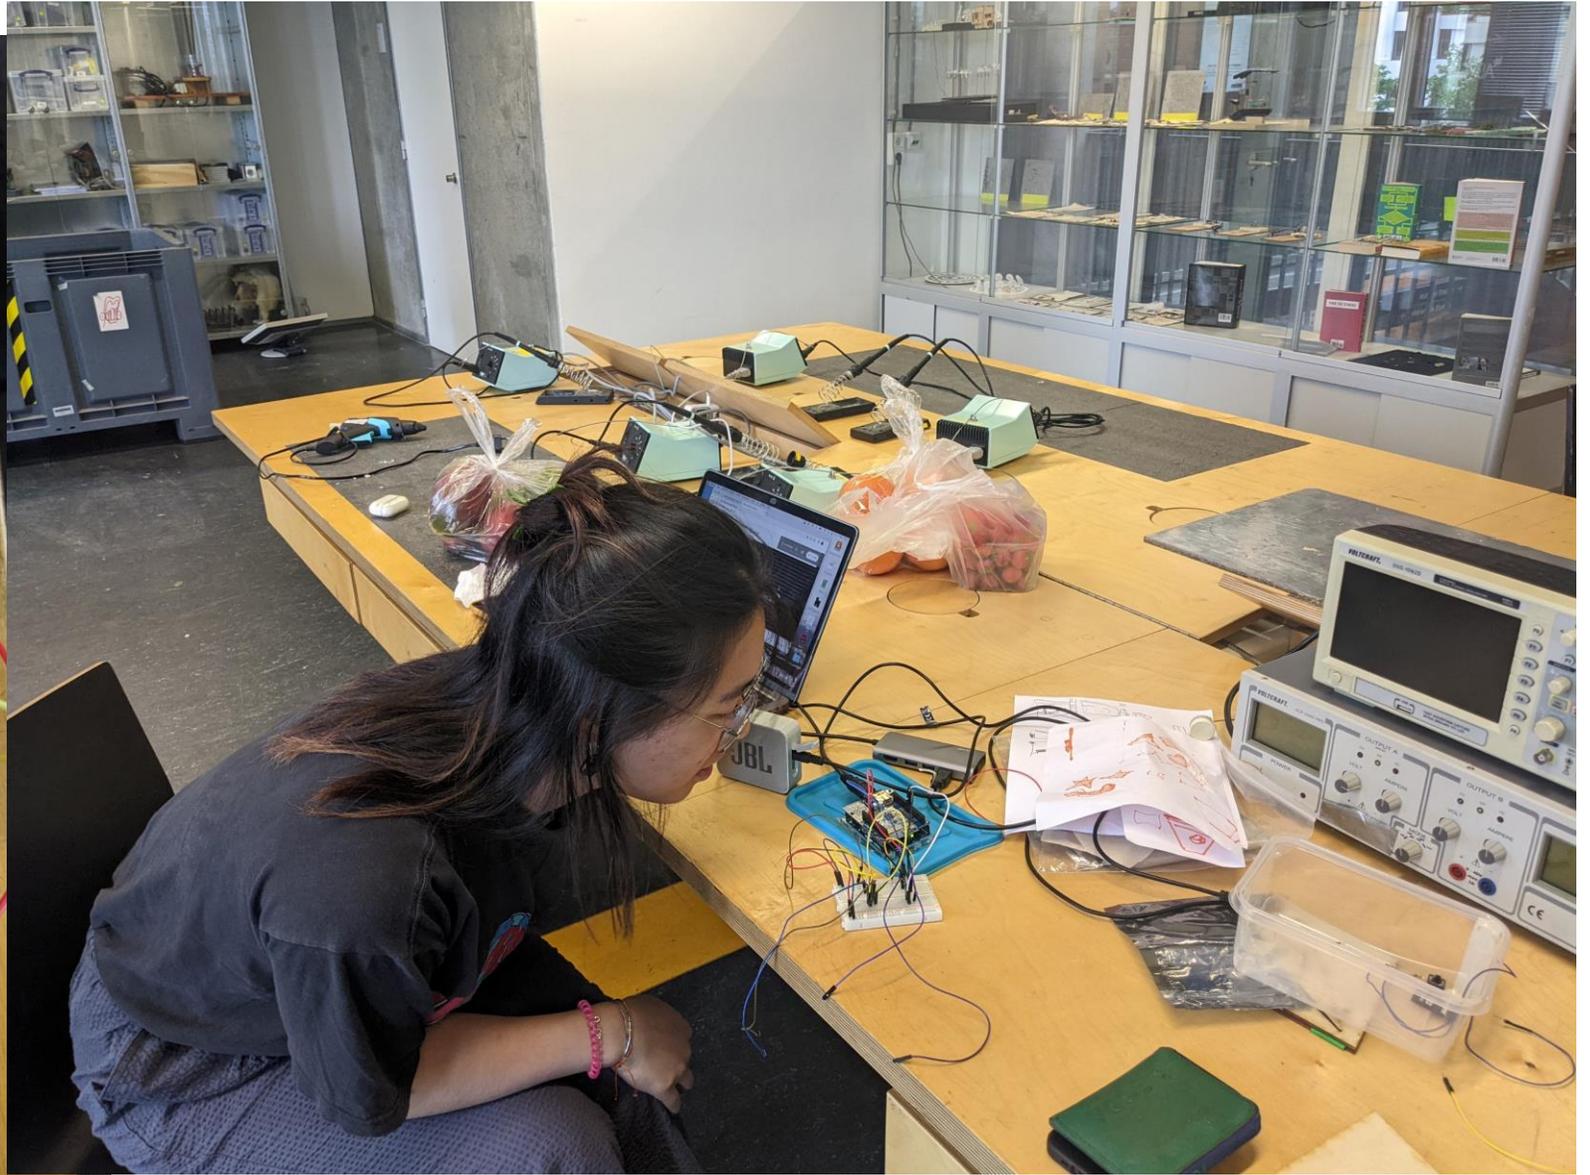

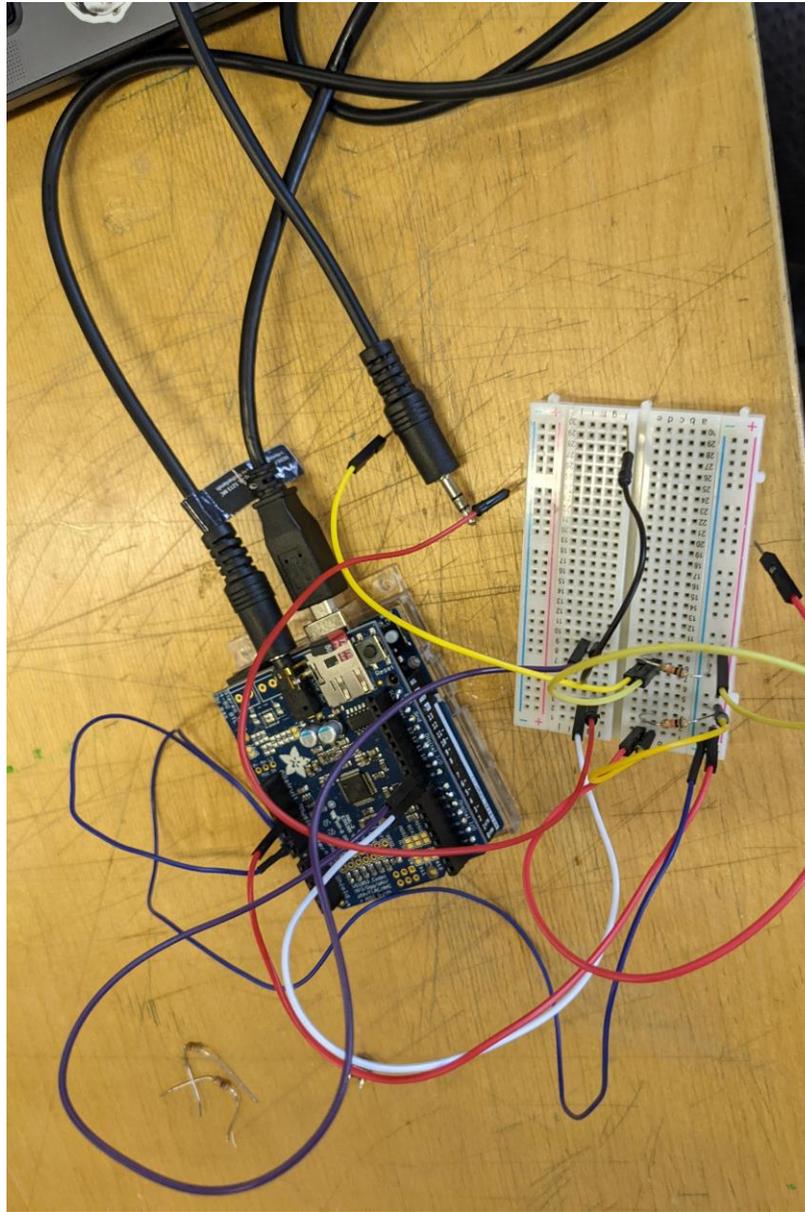

- 
- Handwritten notes on a piece of paper:
- Loved the colors
 - Make the shapes safe
 - Pillow - size
 - Make the box shiny, colorful
 - Add the speaker inside the box
- ↓
Research the materials and paint

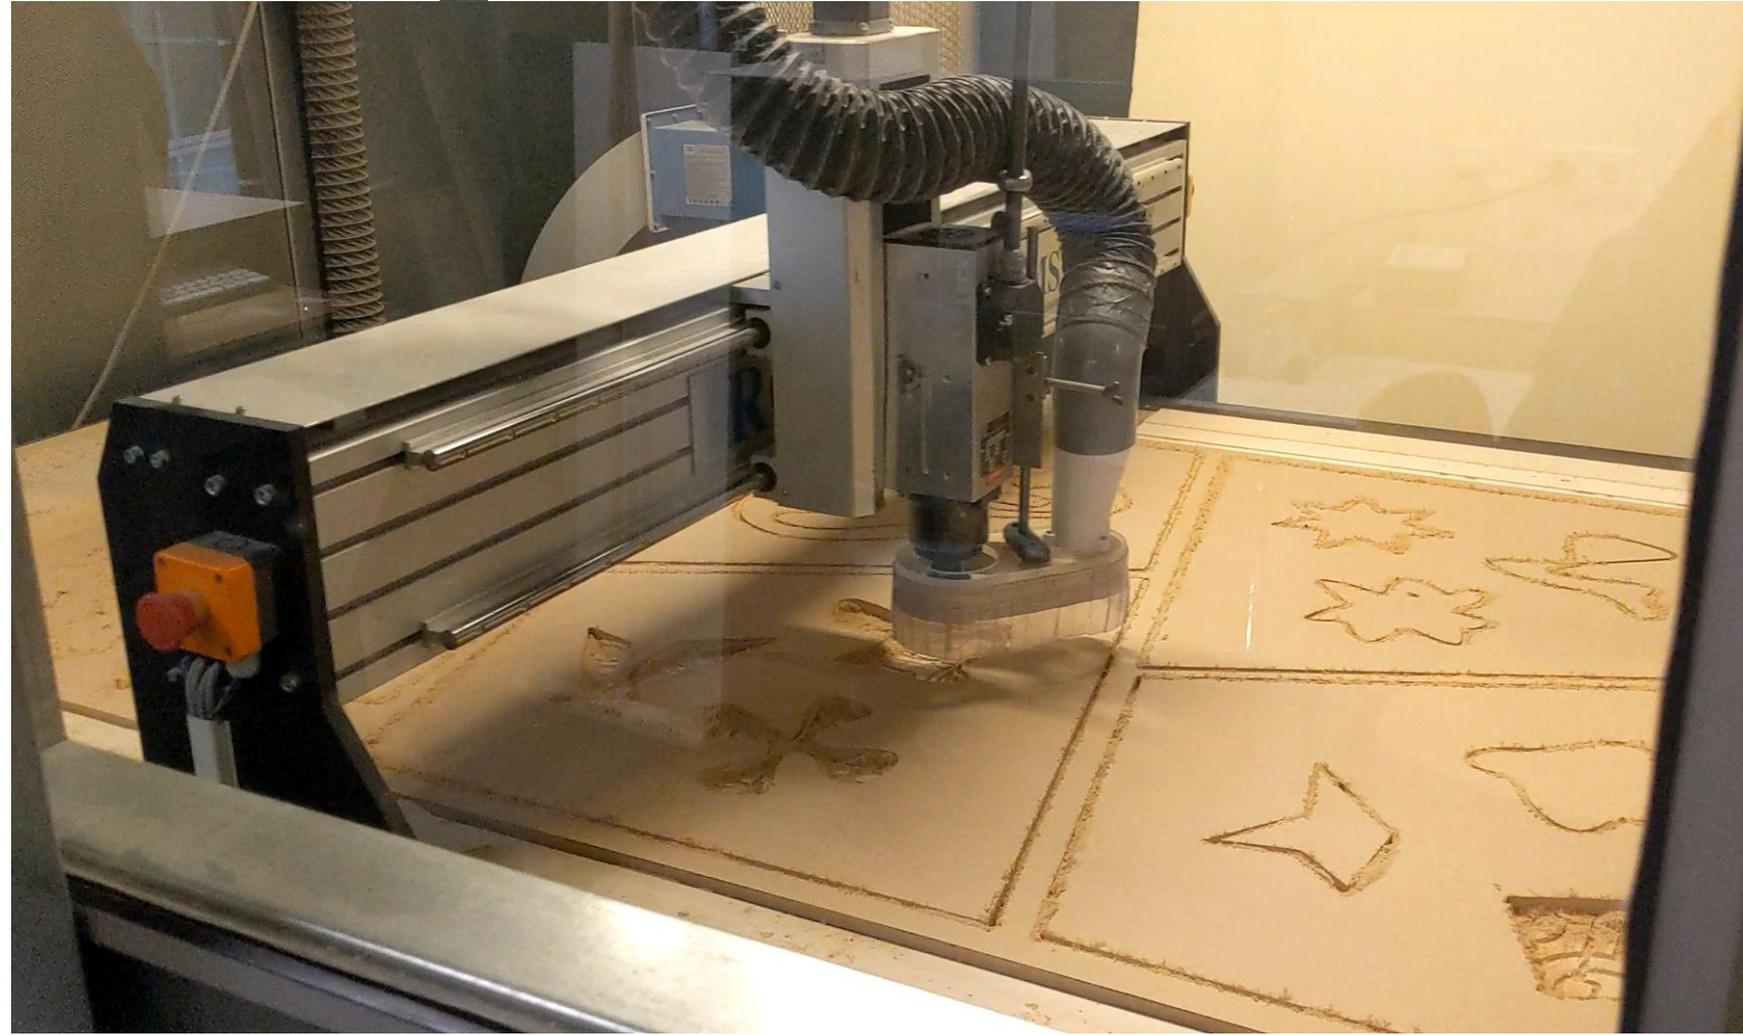

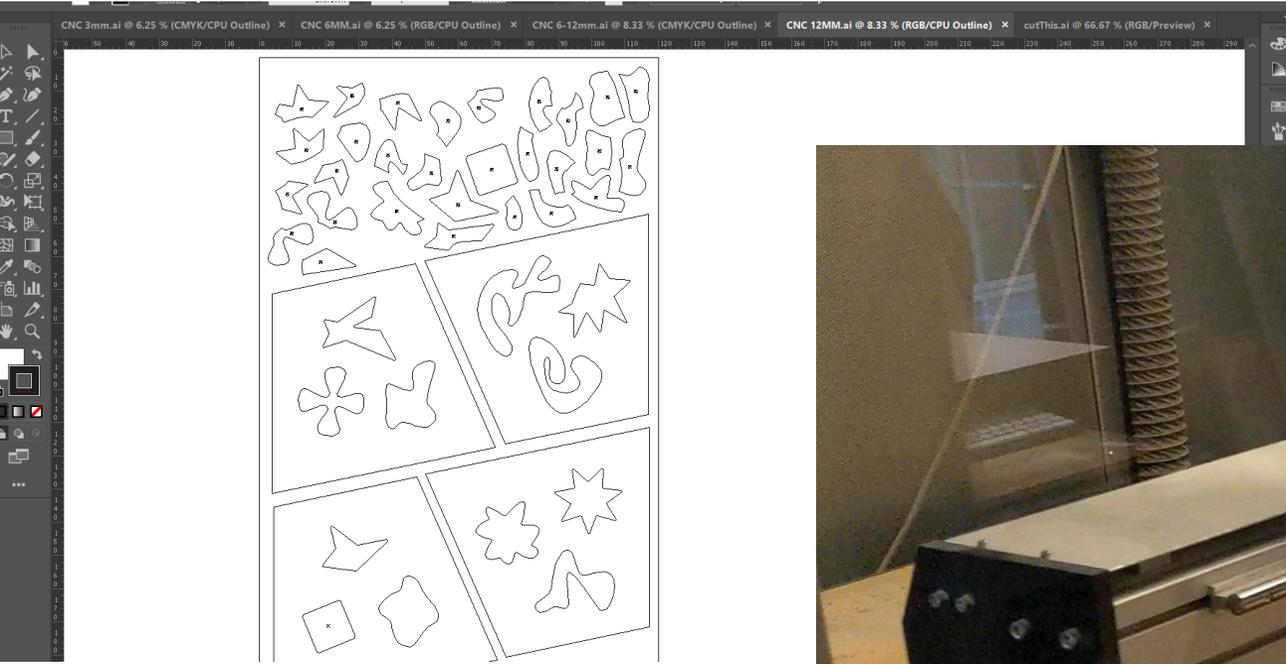

First lo-fi prototype takeaways:

- 1) Color, color, color!
- 2) How to position pillows, puzzle, shapes in the space?
- 3) Shorten the pitch, make it more clear
- 4) Materials: how not to poison the kids - use kids-friendly materials, paint.
- 5) How to make that shapes are not dangerous to kids (sharp corners)

A photograph of Elon Musk standing in front of a large window. The window shows a view of Earth from space, with a bright, circular horizon line and a dark, starry background. Musk is wearing a dark, possibly black, jacket over a dark t-shirt. He is looking slightly to the right of the camera with a neutral expression. The lighting is soft, highlighting his face and the texture of his jacket. The overall tone is professional and futuristic.
